PC Interoperability

Solaris PC NetLink

Solaris PC NetLink ("PC NetLink") is a software product that allows Sun servers to run native Windows NT 4.0 network services on the Solaris Operating Environment.

PC NetLink provides Windows NT naming, authentication, file, and print services on Sun Enterprise servers, increasing the reliability, scalability, and manageability of Windows NT networks.

Requires:

Solaris 2.5.1 or Solaris 2.6.

Description	Order Number
Solaris PC NetLink for SPARC	
PC NetLink Edu for any E5 - E10K Unlimited Client Access, Unlimited Domains, RTU License, Documentation in HTML, Media Kit English and Localized languages Solaris 2.5.1 or Solaris 2.6	SLS9S-100-9E9M
