### SunScreen SPF-200

SunScreen SPF is Sun's strategic platform for perimeter defense, prefacing secure business operations over the Internet. To assure a high level of security, SunScreen SPF uses a stealth design to protect intranets from attack and state-of-the-art SKIP encryption to protect data going over the network. The advanced dynamic packet filtering of SunScreen SPF, coupled with Sun's high speed hardware, is designed to meet the most demanding performance requirements.

#### SunScreen SPF-200 Domestic Version:

- Available only in the U.S. and Canada.

#### SunScreen SPF-200 Global Version:

- The global products can be exported to other countries (except embargoed destinations: Cuba, Iran, Iraq, Libya, and North Korea).
