

System and Network Management

Network Bandwidth Management

Sun Trunking Software 1.2

Trunking 1.2 Software, combined with a trunking-capable switch, allows Gigabit Ethernet ports and Quad Fast Ethernet (QFE) ports to be aggregated together to form one logical port. Customers can bundle together 2 Gigabit Ethernet ports, or up to 8 QFE ports, to form a single trunk over existing cables.

Description	Order Number

Sun Trunking 1.2	
ScholarPAC Sun Trunking software 1.2 Media, Site License and Documentation. Works with X1140A, X1141A, X1034A or X1049A. Requires Trunking compatible switch for server to switch implementation.	UNTRUNK-1.2-SL

General Notes

- *Read the Software licensing information before ordering any software products.*

Network Fault/Performance Management

Solstice Domain Manager 2.3 for Solaris 2.x and 1.x

Description	Order Number
CD-ROM Media (Documentation and No Licenses)	
SunNet Manager 2.3 Software for Solaris 2.x	
ScholarPac Solstice Domain Manager 2.3 for Solaris 2 CD-ROM Media Solstice CC (full) and Network Layout Assistant License is not included	UNSNM-DM-2.3-CD
Single-System License (no Media or Documentation)	
SunNet Manager 2.3 Software for Solaris 2.x	
ScholarPac Solstice Domain Manager 2.3 RTU for Solaris 2 Site License for Domain Manager Solstice CC (full) and Network Layout Assistant are included.	UNSNM-DM-2.3-L
Site License (no Media or Documentation)	
SunNet Manager 2.3 Software for Solaris 2.x	
ScholarPac Solstice Domain Manager 2.3 Site License Media and documentation not included	UNSNM-DM-2.3-SL
ScholarPac Solstice Domain Manager 2.3 Site License for 8/15 Pac Media and doc not included Can only be purchased as part of UN-8-PAC or UN-15-PAC No charge line item	UNSNM-DM-2.3-PAC

General Notes

- *Read the Software licensing information before ordering any software products.*
- *One copy of Solstice SunNet Manager can support a large network (500+ systems). Purchase only one copy per system used as the main monitoring system.*
- *There are no limits on connections to a monitoring system for remote status updates, except as limited by the number of concurrent users authorized by the Solaris license or third-party applications for the monitoring system.*
- *Proxy and agents can be distributed across other systems at no additional charge.*
- *Requires either Solaris 1.x or Solaris 2.x or later Solaris 2.x release.*
- *Domain Manager includes a network layout tool.*
- *Domain Manager site license includes three licenses for Cooperative Consoles.*

System Management

Solaris Resource Manager 1.1

Solaris Resource Manager is a software solution that enables increased resource availability for users, groups and applications. It provides the ability to allocate and control major system resources such as CPU, virtual memory, and number of processes. Solaris Resource Manager software is the key enabler for server consolidation and increased system resource utilization.

Includes:

- Solaris Resource Manager includes the following features:
- Major system resource components: Ability to control CPU, virtual memory, number of processes, number of logins, and connect time.
- Fair-share allocation: Dynamically renewable CPU resources according to predefined policies.
- Hierarchical control model: Map resources to groups within applications and individual users within groups.
- Policy based resource administration: Ability to set resource policies.

Description	Order Number
Solaris Resource Manager 1.0 for SPARC - Media and RTU License	
Solaris Resource Manager 1.1 for Solaris 2.6 & 7 SPARC Platform, Workgroup Serve License (RTU + Media kit) - English; Solaris Bandwidth Manager 1.5 for Solaris 2.6 and 7 - English (RTU for SPARC or X86 platform); NOTE : This is Edu pricing only	SRMIS-110-IE99
Solaris Resource Manager 1.1 for Solaris 2.6 & 7 SPARC Platform Enterprise 3X00 Server License (RTU + Media kit) - English; Solaris Bandwidth Manager 1.5 for Solaris 2.6 and 7 - English (RTU for SPARC and X86 platform); NOTE : This is Edu pricing only	SRMIS-110-XE99
Solaris Resource Manager 1.1 for Solaris 2.6 & 7 SPARC Platform, Enterprise E4X00 & E5X00 Srv Lic (RTU + Media Kit) - English; Solaris Bandwidth Manager 1.5 for Solaris 2.6 and 7 - English (RTU for SPARC and X86 platform); NOTE: This is Edu pricing ONLY.	SRMIS-110-YE99
Solaris Resource Manager 1.1 for Solaris 2.6 & 7 SPARC Platform, Enterprise E6X00 Server License (RTU + Media kit) - English; Solaris Bandwidth Manager 1.5 for Solaris 2.6 and 7 - English (RTU for SPARC and X86 platform); NOTE: This is Edu pricing ONLY.	SRMIS-110-LE99
Solaris Resource Manager 1.1 for Solaris 2.6 & 7 SPARC Platform, Enterprise E10000 Server License (RTU + Media kit) - English; Solaris Bandwidth Manager 1.5 for Solaris 2.6 and 7 - English (RTU for SPARC and X86 platform); NOTE: This is Edu pricing ONLY.	SRMIS-110-CE99

General Notes

- *Read the Software licensing information before ordering any software products.*
- *Solaris Resource Manager 1.0 can only be used in the Solaris 2.6 Operating Environment.*

Solstice AutoClient 2.1 for Solaris 2.x

Solstice AutoClient reduces the cost of desktop management. Solstice AutoClient provides centralized administration for the desktop which eliminates the need to do software installations and backups. Solstice AutoClient turns the desktops's disk to a cache for the operating system, applications, and user data. All administration is done at the server.

Description	Order Number
Media and Licenses (No Documentation)	
Solstice Auto Client 2.1	
ScholarPac Solstice AutoClient 2.1 Unlimited Server and 25 Client License, and Media for SPARC and Intel 25 User Slim Kit	UNAUT-2.1-S25
ScholarPac Solstice AutoClient 2.1 Site License for SPARC and Intel. Unlimited use license for servers and clients. Media and doc not included.	UNAUT-2.1-SL
Documentation only	
Solstice AutoClient 2.1 Documentation	AUT-2.1-D

General Notes

- *Read the Software licensing information before ordering any software products.*
- *A Server license is required for every system acting as an AutoClient server. A Client license is required for every workstation system using AutoClient.*

Sun Management Center 2.1

Sun Management Center is an open, extensible, standards-based system management solution that facilitates active, enterprise-wide management of Sun system products and their subsystems and components.

Sun Management Center software uses Java technology, SNMPv2, usec, and other protocols and standards to provide an integrated and comprehensive management solution to manage Sun desktops, servers, applications, and business processes.

Description	Order Number
Sun Management Center 2.1 for 10 servers,Scholarpac (RTU license)	SYM9-210-EE99
Sun Management Center 2.1 for 250 desktops,Scholarpac (RTU licens	SYME9-210-DE99
