# Sun Ray 1 Enterprise Appliance Configuration

### Sun Ray 1 enterprise appliance

A stateless zero administration “plug-and-work” device that is centrally managed by, and is dedicated to display user sessions, from a server running the Sun Ray 1 enterprise server software.

### Sun Ray enterprise server software

The server-based software used to manage, administer and provide the screen display for any Sun Ray 1 enterprise appliance on the network.

### Graphics Options

The Sun Ray 1 supports 24 bit, 2D accelerated graphics

### Monitor Options

The choice of monitors is not reflected in the Sun Ray 1 marketing part number. A monitor is optional and is ordered as a separate line item. The Sun Ray 1 enterprise appliance supports the monitors listed below.

Part number	Monitor Option description
X7126A	17-inch color monitor
X7127A	18.1-inch TFT LCD color monitor
X7135A	19-inch flat screen color monitor
X7136A	21-inch flat screen color monitor
X7124A	24-inch color monitor

### Country Kits

The Sun Ray 1 enterprise appliance is available with localized country kits. Please select appropriate part number.

### OS Software

Sun Ray enterprise server software must be installed on a SPARC Solaris server running Solaris 2.6 or Solaris 7.
