

Hardware Upgrades

High-End/Data Center Servers

Ordering Flow Chart for Upgrades to Enterprise 10000

Each step represents a **required/recommended** line item on a Sales Order

Step 1 - required

Server Base System Upgrade

UG-E5X00-E10000-4
UG-E6X00-E10000-4

Step 1a - required

Order: UG-RMA
(Return Material Athorization Kit) - no charge

UG-M2510-M2550E10K - 250 MHz/4MB, fact inst.
UG-M2560 - 333MHz Module w/ 4MB E-cache
UG-M2580 - 400MHz Module w/ 8MB E-cache
UGFA-M2510-M2560 - 333MHz/4MB
UGFA-M2510-M2580 - 400MHz/8MB
UGFA-M2530-M2560 - 333MHz/4MB
UGFA-M2550-M2580 - 400MHz/8MB
UGFA-M2560-M2580 - 400MHz/8MB
2550A - 250 MHz, 4MB external cache
2560A - 333MHz, 4MB external cache
2580A - 400MHz, 8MB external cache

Step 2 - required

UltraSPARC Module Upgrade
Minimum of 4 per System.
One to four per System Board.
Maximum of 64 per E10000.

Step 3 - required

System Board Upgrade
Minimum of one per System.
Maximum of 16 per E10000.

UG-260X-2761-SB1 - E10000 System Board
UG-260X-2761-SB2 - E10000 System Board
2761A - E10000 System Board

Step 4 - optional

Memory (order as required)
Minimum of 2 x 7022A or 2 x 7023A per System Domain.
Maximum of four per Memory Board.
Maximum of 64 per E10000.

EITHER:
7022A - 256 MB Memory
OR:
7023A - 1 GB Memory
OR:
UGFA-MEM256-MEM1GB - 1 GB Memory

Step 5 - required

Memory Board
Minimum of one per System.
Maximum of 16 per E10000.

7025A- Memory Board

Step 6 - required

Control Board
Minimum of one per System.
Two for redundancy.

2722A - Control Board w/ Ethernet Hub

Step 7 - required

Power Supplies
Minimum of five per System.
Eight if more than 8 System Boards.

9685A - 48V Power Supply

Ordering Flow Chart for Upgrades to Enterprise 10000 (cont.)

Each step represents a **required/recommended** line item on a Sales Order

Step 8 - required

AC Breakers
Minimum of three per System.
Four if more than eight System Boards.

3875A - AC input module

Step 9 - required

Cooling Fans
Minimum of ten per System.
16 if more than 8 System Boards.

9671A - Fan tray

Step 10 - required

Power Control Module/2nd Sequencer
Up to five Power Control Modules per System.
One 2nd AC Power Sequencer.

9681A - Power Control Module w/cable
9620A - Optional 2nd AC power sequencer

Step 11 - required

System Service Processor (SSP)
Minimum of one per System.
Two for redundancy.

Select One:
2754A- System Service Processor (Ultra 5)
2755A- System Service Processor (E250)

Step 12 - required

SSP Country Kits
Order one per SSP.

Choose one:
3508A- North american/Universal Type 6 country kit
3530A- European/Universal Type 6 country kit
3509A- French Type 6 country kit
3510A- German Type 6 country kit
3571A - Portuguese Type 6 country kit
3514A- United Kingdom Type 6 country kit

Step 13 - required

Software
Order must include one of each. Order should also include one copy of Sun Enterprise Netbackup Software

SOLMS-26EW9999 - Solaris 2.6 Server edition
SOLS-2.5.1NOV97 - Solaris 2.5.1 Server edition
SSP9S-320-SAM9 - System Service Processor 3.2
ENB9S-311-S999 - Sun Enterprise Netbackup 3.1.1

Step 14 - required

I/O Board (SBus or PCI)
Minimum of one per System.
Maximum of 16 per Enterprise 10000.
Any Mix allowed

2730A - Dual SBus I/O Board
2731A - Dual PCI I/O daughter Board

Ordering Flow Chart for Upgrades to Enterprise 10000 (cont.)

Each step represents a **required/recommended** line item on a Sales Order

Step 15 - optional

Internal Disk Storage options

Maximum of 2 StorEdge D1000's in E10000.

Choose from:

SG-ARY136A-72GR4 - 72GB StorEdge D1000

Step 16 - optional

Interfaces and Host Adapters

These options may be required to support configured mass storage and tape devices (optional).

Choose one:

1062A - SBus DWIS/S Host Adapter
1148A - SBus ATM - 155/UTP Host Adapter
1063A - SBus SWIS/S Host Adapter
1065A - SBus Ultra DWIS/S Host Adapter (Req for Internal Storage - 1 per D1000 Tray)
1070A - HPPI PCI Network Interface Card
1140A - SBus Gigabit Ethernet 2.0 Adapter
1141A - PCI Gigabit Ethernet 2.0 Adapter
1049A - Quad FastEthernet SBus Card (QFE)
1142A - SBus SAS FDDI 6.0 Adapter
1143A - SBus DAS FDDI 6.0 Adapter
1059A - SBus Fast Ethernet Adapter 2.0
1146A - SBus Serial Parallel Controller (SPC/S)
1018A - SBus SunSwift 100BaseT Adapter
X1145A - SBus High-Speed Serial Interface (HSI/S)
1147A - SBus SunATM-155/MFiber Adapter 4.0
1149A - SBus SunATM-622/MFiber Adapter
1144A - Token Ring Interface/SBus (TRI/S) Card

Step 17 - required

Power Cord for System

Minimum of three.
Maximum of four per Cabinet.
Order 4 if more than 8 System Boards.

Choose one:

3865A - Power Cord, U.S. Version
3851A - Power Cord, International Version

Step 18 - required

Power Cord for AC Sequencers in System

One required, two if a 2nd AC Sequencer

Choose one:

3800A - Power Cord, U.S. Version
3848A - Power Cord, International Version

Step 19 - required

Submit Configuration to DHPG SalesDesk, with E10000 Configuration Diagram.
<http://sales-desk.West/>

Upgrades to Enterprise 10000

Description	Order Number
From Enterprise 5000	
System upgrade from E5X00 system cabinet to E10000 base cabinet, Centerplane with two Centerplane Support boards, and I/O space with power sequencer, Solaris license with unlimited users, license for SSP software. Customer Returns: * E5X00 Data Center System Cabinet with two Power Cooling Modules, Clock Board and SunCD	UG-E5X00-E10000-4
From Enterprise 6000	
System upgrade from E6X00 system cabinet to E10000 base cabinet, Centerplane with two Centerplane Support boards, and I/O space with power sequencer, Solaris license with unlimited users, license for SSP software. Customer Returns: * E6X00 Data Center System Cabinet with two Power Cooling Modules, Clock Board and SunCD	UG-E6X00-E10000-4
From Enterprise 6000 system to Starfire Express System	
Upgrade from an Sun E6x00 Server cabinet to an Sun Enterprise 10000 Power Express System base cabinet which includes: 8 power supplies (9685A), 4 AC Input Modules (3875A), 16 fan trays (9671A) Customer Returns: One Sun E6x00 server chassis with two power/ cooling modules, clockboard and SunCD Note: UG-RMA must be ordered in the same ship set.	UG-E6X00-E10000-D

Upgrade to Enterprise 10000 System Board

From Enterprise 6000 CPU/Memory Board

System board upgrade from one(1) E5X00 CPU/Memory Boards to one(1) E10000 2761A System Board, no Processor, no Memory Board, and no SIMMs are included. --FACTORY INSTALLED ONLY Customer Returns: One 260x CPU/Memory Boards (To be ordered with chassis upgrade	UG-260X-2761-SB1
---	------------------

General Notes

- *Maximum discount may apply; contact your local Sun sales representative for details.*
 - *This upgrade requires Solaris 2.5.1 HW 2/97 or later Solaris 2.x release.*
-

Ordering Notes

- *To configure an Enterprise 10000 system upgrade, order as needed, Module, System Board, Dual SBus I/O Board upgrades. See the appropriate Module & Board upgrade information and pricing.*
- *Enterprise 10000 supports only 250-MHz or 333-MHz UltraSPARC, or 400-MHz Processor Modules. Order Module upgrades as necessary.*
- *For additional system boards, memory, disk options, disk controllers, and tape drives, refer to the "Enterprise 10000" section and the Options section.*
- *Terms and conditions of upgrade sale requires that residuals be returned to Sun Microsystems within 30 days of receipt of product, otherwise you will be billed for the non-returns.*

Upgrades to Enterprise 10000 *(continued)*

Description	Order Number
Upgrade to Enterprise 10000 System Board <i>(continued)</i>	
From Enterprise 6000 CPU/Memory Board <i>(continued)</i>	
System board upgrade from two(2) EXX00 CPU/Memory Boards to one(1) E10000 2761A System Board, no Processor, no Memory Board, and no SIMMs are included. --FACTORY INSTALLED ONLY Customer Returns: Two 260x CPU/Memory Boards (To be ordered with chassis upgrade)	UG-260X-2761-SB2
From old Enterprise 10000 System Board (X)2760A	
System board upgrade from one (1) 2760A E10000 System Board to one(1) E10000 2761A System Board. no processor, no Memory Board, and No SIMMs are included. CONFIGURE TO ORDER -- FIELD INSTALLED ONLY Customer Returns: One E10000 2760A system board	UG-2760A-C2761A ²
From Enterprise 6000 I/O Board	
Board upgrade from E6000 SBus I/O Board to E10000 Dual SBus I/O Board. Customer Returns: * One E6000 SBus I/O Board To be ordered with E6000 to E10000 system upgrade only.	UG-SBIO-DSBIO

Sun Enterprise 10000 Server memory upgrade

From 256-Mbyte (8 x 32-Mbyte SIMM modules - (X)7022A) to 1-Gbyte (8 x 128-Mbyte SIMM modules - (X)7023A)

Upgrade from 256-Mbyte (7022A) Enterprise Server memory to 1GB (7023A) of memory
***Note: ONLY FOR 7023A compatible Enterprise Servers Customer returns: one 256MB (7022A) Memory Module

UG-MEM256-MEM1GB ^{1,3}

Upgrade from 256-Mbyte (7022A) Enterprise Server memory to 1GB (7023A) of memory
***Note: ONLY FOR 7023A compatible Enterprise Servers- FACTORY INSTALL Customer returns: one 256MB (7022A) Memory Module

UGFA-MEM256-MEM1GB

General Notes

- *Maximum discount may apply; contact your local Sun sales representative for details.*

Ordering Notes

- *Enterprise System Board Upgrades may be ordered with the appropriate Chassis Upgrades to yield a system upgrade with multiple number of system boards.*
- *Terms and conditions of upgrade sale requires that residuals be returned to Sun Microsystems within 30 days of receipt of product, otherwise you will be billed for the non-returns.*

Footnotes

1. *This upgrade cannot be configured at the factory. It is a field installed upgrade.*
2. *Please note: The family name (UG-E10000-CTO) must be selected when entering a CTO upgrade order via Sun's order entry process.*
3. *Standard Configurations are Sun's recommended configurations.*

Upgrades to Enterprise 10000 *(continued)*

Description	Order Number
Sun Enterprise 10000 Control Board upgrade - Field Installed	
From one Sun Enterprise 10000 control board	
Upgrade to a 5:1 ratio Enterprise 10000 Control Board Field Installed Customer Returns: 2721A control board only (not ethernet hub)	UG-E10K-5/1CONTRLB

General Notes

- *Maximum discount may apply; contact your local Sun sales representative for details.*
-

Ordering Notes

- *Enterprise System Board Upgrades may be ordered with the appropriate Chassis Upgrades to yield a system upgrade with multiple number of system boards.*
 - *Terms and conditions of upgrade sale requires that residuals be returned to Sun Microsystems within 30 days of receipt of product, otherwise you will be billed for the non-returns.*
-

Footnote

1. *This upgrade cannot be configured at the factory. It is a field installed upgrade.*

Enterprise 10000 Board Upgrades

Description	Order Number
Upgrade to Enterprise 10000 System Board	
From Enterprise X000 83MHz Clock Board	
5:1 Enterprise Sys Clock board upgrade. Required for 400MHz/8MB Faster UltraSPARC module. Customer returns: Enterprise system clock board.	UG-5/1-CLOCKBOARD ¹
From Enterprise 6000 CPU/Memory Board	
System board upgrade from one(1) EXX00 CPU/Memory Boards to one(1) E10000 2761A System Board, no Processor, no Memory Board, and no SIMMs are included. --FACTORY INSTALLED ONLY Customer Returns: One 260x CPU/Memory Boards (To be ordered with chassis upgrade	UG-260X-2761-SB1
System board upgrade from two(2) EXX00 CPU/Memory Boards to one(1) E10000 2761A System Board, no Processor, no Memory Board, and no SIMMs are included. --FACTORY INSTALLED ONLY Customer Returns: Two 260x CPU/Memory Boards (To be ordered with chassis upgrade	UG-260X-2761-SB2
From old Enterprise 10000 System Board (X)2760A	
System board upgrade from one (1) 2760A E10000 System Board to one(1) E10000 2761A System Board. no processor, no Memory Board, and No SIMMs are included. CONFIGURE TO ORDER -- FIELD INSTALLED ONLY Customer Returns: One E10000 2760A system board	UG-2760A-C2761A ²
From Enterprise 6000 I/O Board	
Board upgrade from E6000 SBus I/O Board to E10000 Dual SBus I/O Board. Customer Returns: * One E6000 SBus I/O Board To be ordered with E6000 to E10000 system upgrade only.	UG-SBIO-DSBIO

General Notes

- *Maximum discount may apply; contact your local Sun sales representative for details.*

Ordering Notes

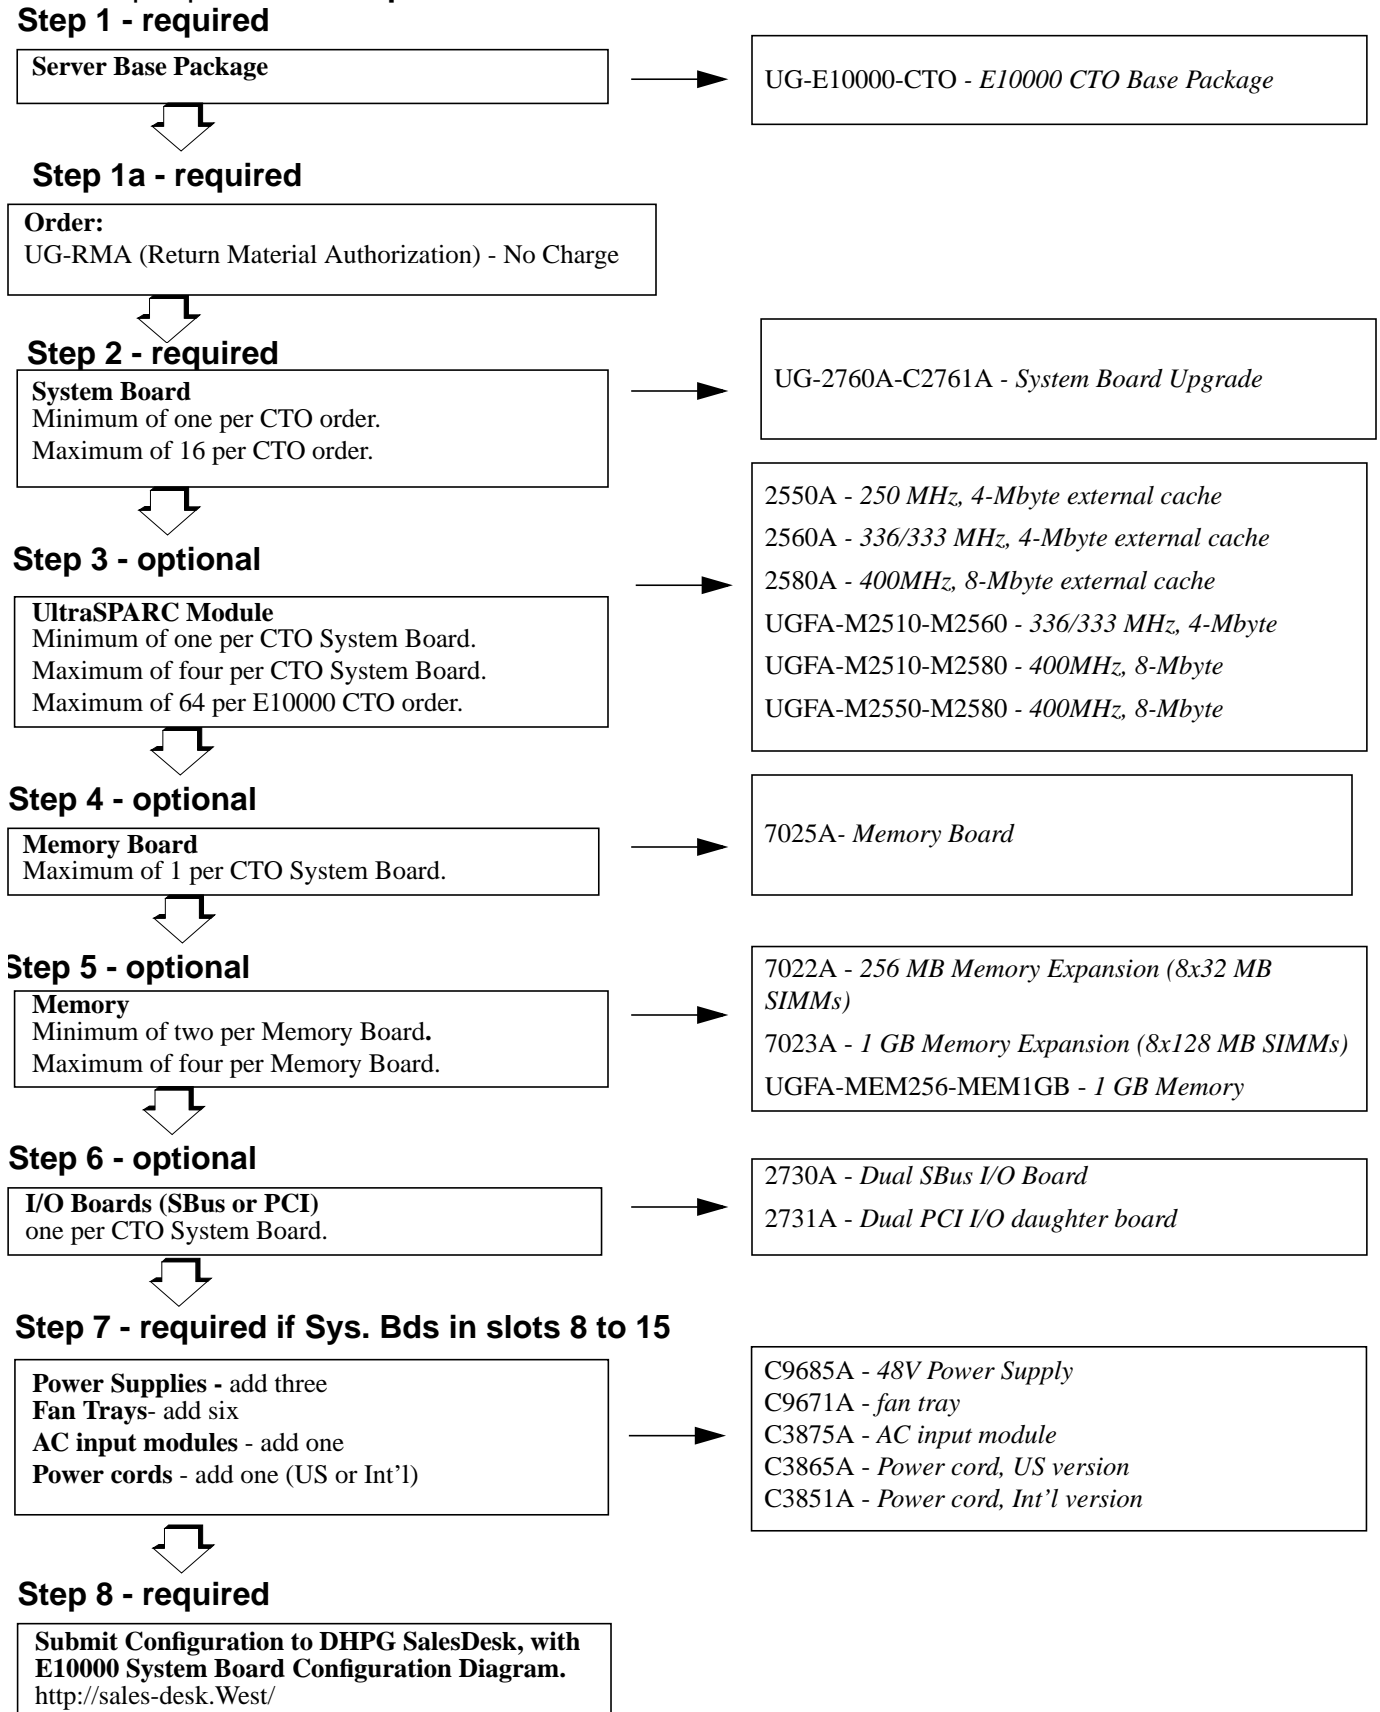

- *Enterprise System Board Upgrades may be ordered with the appropriate Chassis Upgrades to yield a system upgrade with multiple number of system boards.*

Enterprise 10000 Capacity-On-Demand Upgrades Ordering Flow Chart

Each step represents a **required/recommended** line item on a Sales Order

Step 1 - required

Server Base Package

UG-E10000-C - *Enterprise 10000 Capacity-On-Demand Base Package includes: 8 power supplies (9685A), 4 AC input modules (3875A), 16 fan trays (9671A), and includes a RTU license to use 8 UltraSPARC 400MHz 8-Mbyte Modules.*

Step 2 - required

Capacity-On-Demand System Board Package

Minimum of 5 per Capacity-On-Demand System.
Maximum of 16 per Capacity-On-Demand System.

UG-2860A - *Capacity-On-Demand System Board Package includes: 1-system board (2761A), 4 UltraSPARC Modules 400MHz 8-Mbyte external cache (2580A), 2 GB Memory (7023A), 1 memory board (7025A), and 1 dual SBus I/O board (2730A).*

Step 3 - optional

License for additional RTU CPUs for UG-E10000-C only

Note: Orderable only with Server Upgrade Base Package (UG-E10000-C)

UG-E10000RTU-TIER1 - *One RTU License for One 400MHz 8-Mbyte UltraSPARC Module. Order for additional RTU CPU licenses for E10000-C base package up to 20 RTU licenses (note: E10000-C includes 8 RTU CPU Licenses)*

Step 4 - required

Go to Step 4-12 page 4-153. for additional required components

2722A - *Control Board, with Ethernet Hub*

Step 5 - required

RMA Kit

Order quantity of one.

UG-RMA- *Return Material Authorization Kit*

Step 6 - required

Submit Configuration to DHPG SalesDesk, with E10000 Configuration Diagram.

Enterprise 10000 Capacity-On-Demand System Upgrade Configuration Guidelines

General Comments

- All items which are supported with the standard E10000 configuration are also supported with E10000 Capacity-On-Demand base package, refer to the E10000 order note section for configuration rules.

Capacity-On-Demand Server Upgrade Base Package Information

- Enterprise 10000 Capacity-On-Demand Upgrade Base Package includes: system chassis, 8 power supplies (9685A), 4 AC input modules (3875A), 16 fan trays (9671A), and includes RTU license to use 8 UltraSPARC Modules 400MHz 8-Mbyte modules and Licenses for AP and SSP software.
- A single qualified minimum configured server must be returned.

Capacity-On-Demand System Board Package

- Capacity-On-Demand System Upgrade Board Package includes: 1 system board (2761A), 4 UltraSPARC Modules 400MHz 8-Mbyte external cache (2580A), 2 GB Memory (7023A), 1 memory board (7025A), and 1 dual SBus I/O board (2730A).
- Minimum of five per system. Maximum number of System Boards is 16.
- Capacity-On-Demand System Upgrade Board Package does not include any RTU CPU license, must be ordered separately.
- Trade-in requirement is the identical minimum system traded in when ordering the upgrade Capacity-On-Demand Base.

CPU Licensing for E10000 Capacity-On-Demand Upgrade Base Package ONLY

- The E10000 Capacity-On-Demand Upgrade Base Package only includes a license to utilize 8 UltraSPARC Modules 400MHz 8-Mbyte.
- Order License for additional RTU CPUs for UG-E10000-C only via UG-E10000RTU-TIER1 P/N, up to 20 CPU RTU Licenses. Note: Customer must trade-in one additional CPU from qualified server being upgraded for each RTU license ordered.
- Must be ordered/shipped with Capacity-On-Demand Base Upgrade Package.

CPU Licensing for E10000 Capacity-On-Demand Beyond 20 CPU RTU Licenses

- Order additional Capacity-On-Demand System Board Packages with the UG-E10000-C Base beyond the minimum 5 where the customer is trading in more than 12 additional CPU modules.
- Order for additional CPU licenses beyond 20 RTU licenses for UG-E10000-C base package via UG-E10000RTU-TIER2.
- Note: Customer must trade-in one additional CPU from qualified server being upgraded for each RTU license ordered.
- Must be ordered/shipped with Capacity-On-Demand Base Upgrade Package.

Enterprise 10000 Capacity-On-Demand Upgrade Sample Configurations

Enterprise 10000 Configuration		
<i>Quantity</i>	<i>Order Number</i>	<i>Description</i>
1	UG-E10000-C	Enterprise 10000 Capacity-On-Demand Base Package includes: system chassis, 8 power supplies (9685A), 4 AC input modules (3875A), 16 fan trays (9617A), and includes a RTU license to use 8 UltraSPARC 400MHz 8-Mbyte Modules
5	UG-2860A	COD System Board Package includes: 1 system board (2761A), 4 UltraSPARC Modules 400MHz 8-Mbyte external caches(2580A), 2 GB Memory (7023A), 1 memory board (7025A), and 1 dual SBus I/O board (2730A).
4	3865A or 3851A	Power Cords
1	SOLMS-26EW9999	Solaris 2.6 HW 5/98 for Servers
1	SOLMS-070WD999	Solaris 7 media kit which includes E10000 System Service Processor 3.1.1 software
1	E10000-SW-COD-1.0	Sun Enterprise 10000 Capacity-On-Demand software
1	2754A	E10000 System Service Processor (Ultra 5 with 19" monitor)
1	2722A	E10000 Control Board
1	various	SSP Country Kit
1	1049A	Quad FastEthernet SBus Card (QFE)
1	SG-ARY147A-36GR4	36GB StorEdge D1000
1	1065A	SBus Ultra Differential F/W Intelligent SCSI Host Adapter
1	3800A/3848A	Power Cord for E10000 internal I/O
1	UG-RMA	Return Material Authorization Kit
Enterprise 10000 with twenty 400-MHz/8MB UltraSPARC Processors, 10-Gbyte of Memory and 36-Gbyte of internal disk storage		

Enterprise 10000 Capacity-On-Demand Upgrades

Description	Order Number
Upgrade to Enterprise 10000 System Board	
Upgrade from an E5x00 or E6x00 Server minimum system to a Sun Enterprise 10000 capacity-, on-demand base cabinet includes: 8 power supplies (9685A), 4 AC Input Modules (3875A), 16 fan trays (9671A) and a RTU license to use 8 UltraSPARCII 400MHz 8-Mbyte Modules One Sun E5x00 or E6x00 chassis with minimum system components. Note: UG-RMA must be ordered in same ship set.	UG-E10000-C ¹
Upgrade a Sun E5x00 or E6x00 server w/minimum components to a to Sun Enterprise 10000 capacity-, on-demand system board package: 1 system boards (2761A), 4 USII modules 400MHz-8Mbyte external cache (2580A), 2GB Memory (7023A), 1 Memory Boards (7025A), 1 dual SBus I/O Boards (2730A), DOES NOT include any RTU Licenses. FACTORY CONFIGURED ONLY with base UG-E10000-C upgrade package Customer Returns:Same minimum syste traded in when ordering upgrade COD base (UG-E10000-C)	UG-2860A
Upgrade from Sun E5x00 or E6x00 server and order an additional Sun Enterprise 10000 right-to-use lic; for 9th through 20th CPU RTU Lic. An UltraSPARC CPU module must be traded in for each right-to-use license.(NOTE: initial eight RTU's included in UG-E10000-C base pkge) ONLY ORDERABLE WITH THE FACTORY CHASSIS UPGRADE Customer Must Return: One UltraSPARC CPU from Sun Enterprise E5x00 or E6x00 server	UG-E10000RTU-TIER1
Upgrade from a Sun Enterprise 5x00 or 6x00 server and order an additl Enterprise 10000 RTU license for 21st to 64th CPU right-to-use license; an UltraSPARC CPU module must be traded in for each right- to-use license(NOTE: initial eight right-to-use licenses included in UG-E10000-C base package.) ONLY ORDERABLE with FACTORY CHASSIS UPG Customer Returns: One UltraSPARC CPU from Sun Enterprise 5x00 or 6x00 server	UG-E10000RTU-TIER2

Footnote

1. UG-RMA must be ordered.

Server Consolidation Trade-In Program

Server Consolidation Trade-In Program Notes

What is the Server Consolidation Trade-In Program

The Server Consolidation Trade-in Program enables customers to trade-in additional older Sun servers or competitive servers and enrich a configuration by populating their existing Sun Enterprise 250, 450, 3X00, 4X00, 5X00, 6X00, or 10000 server with additional system boards, memory, and CPU modules at a reduced price.

As an enhancement to the chassis-for-chassis upgrade program, Sun provides a program for customers to enrich a configuration by populating their existing Sun Enterprise 250, 450, 3X00, 4X00, 5X00, 6X00, or 10000 server with additional system boards, memory, and CPU modules.

How does the Server Consolidation Trade-In Program work

(a) First Transaction

Obtain a Sun Enterprise server chassis and minimum system components via Sun's existing offerings such as:

(a) Boxes for Box

- Consolidate multiple older Sun or non-Sun Server workloads onto a new Sun Enterprise Server

Point Requirements for Consolidating Base Packages

Minimum Points	Target Sun Server consolidating into
1	E3500
2	E4500
2	E5500
4	E6500
8	E10K

(b) Boxes for Boards

- Trade in select, older Sun or competitive server(s) and purchase Sun boards and modules at a reduced price:

NOTE: A web-based "Trade-In Consolidation Calculator" which guides the user through Step 1 and Step 2 is available at <http://edss.corp/attackpack/consolidate/expand/>

STEP 1

Identify point value of each eligible server(s) traded-in. Ensure total points meets minimum required per transaction. The point value awarded for each server trade-in can be viewed in the "Trade-In Consolidation Calculator" at <http://edss.corp/attackpack/consolidate/expand/>

STEP 2

Identify quantity and type of eligible boards, CPU modules to be purchased. Determine that quantity and type are within the maximum allowed based on the total accumulated points. See Components Quantity Limit Matrix below.

STEP 3

REQUIRED: Each consolidation Trade-In Program Order must include a proposal page obtained by using the "Trade-In Consolidation Calculator" at: <http://edss.corp/attackpack/consolidate/expand/>

Description	Order Number
For Consolidation on E250 and E450	
Server consolidation trade-in of qualifying Sun or non-SUN workgroup server system for 512-Mbyte (4x128-Mbyte Sun DIMM modules) of memory. ***NOTE: ONLY for X7004A compatible Workgroup Servers E450 and E250 *** FIELD INSTALLED Customer returns: Qualified competitive or Sun server system(s) including chassis	CU-CONSL-512MB ^{1,2}
Server consolidation trade-in of qualifying Sun or non-SUN workgroup server system for 512-Mbyte (4x128-Mbyte Sun DIMM modules) of memory. ***NOTE: ONLY for X7004A compatible Workgroup Servers E450 and E250 *** FACTORY INSTALLED Customer returns: Qualified competitive or Sun server system(s) including chassis	CUCONSLFA-512MB ^{1,2}
Server consolidation trade-in of qualifying Sun or non-SUN workgroup server system for 1024-Mbyte (4x256-Mbyte Sun DIMM modules) of memory. ***NOTE: ONLY for X7005A compatible Workgroup Server E450 *** FIELD INSTALLED Customer returns: Qualified competitive or Sun server system(s) including chassis	CU-CONSL-A25-1GB ^{1,3}
For Consolidation on E450	
Server consolidation trade-in of qualifying Sun or non-SUN workgroup server system for 1024-Mbyte (4x256-Mbyte Sun DIMM modules) of memory. ***NOTE: ONLY for X7005A compatible Workgroup Server E450 *** FACTORY INSTALLED Customer returns: Qualified competitive or Sun server system(s) including chassis	CUCONSLFA-A25-1GB ^{1,3}

Footnote

1. The Consolidation Return Materials Authorization (RMA) (CU-CONSOL-RMA) kit must be ordered equal to the quantity of qualified servers being returned to Sun. RMA kit(s) must be in the same ship-set as the upgrade.
2. Only for 7004A-compatible workgroup servers, Sun Enterprise 450 and Sun Enterprise 250.
3. Only for X7005A-compatible workgroup server, Sun Enterprise 450.

Server Consolidation Trade-In Program *(continued)*

Description	Order Number
For Consolidation on E250 - Factory Installed Components	
Consolidation upgrade from Competitive workgroup server or Sun platform to 400MHz/2MB e-cache CPU FACTORY INSTALLED Customer returns: *One competitive server chassis or Sun system with CPU and board	CUCONSLFA-A26M1194 ¹
For Consolidation on E250 - Field Installed Components	
Competitive consolidation trade-in for 400MHz CPU with 2MB e-cache UltraSPARC II. FIELD INSTALLED. Customer returns: *Competitive chassis with CPU.	CU-CONSL-A26-M1194 ¹
Competitive consolidation trade-in for 300MHz CPU with 2MB e-cache UltraSPARC II. Field installed. Customer returns: *One competitive CPU module or CPU	CU-CONSL-A26-M1191 ¹
For Consolidation on E450 - Factory Installed Components	
Consolidation upgrade from competitive CPU/board or Sun platform to 400MHz/4MB e-cache CPU module for the E450 server Customer returns: *One competitive CPU module or board or Sun module or system	CUCONSLFA-A25M2244 ¹
For Consolidation on E450 - Field Installed Components	
Competitive consolidation trade-in for 300MHz CPU with 2MB e-cache UltraSPARC II and dc/dc converter. Field Installed. Customer returns: *One competitive CPU module or CPU	CU-CONSL-A25-M2240 ¹
Competitive Consolidation Trade In from Competitive CPU/ board and receive 400MHz/4MB ecache module & DC/DC conv Customer returns: * One comopetitive CPU module or board	CU-CONSL-A25-M2244 ¹

Footnote

1. *The Consolidation Return Materials Authorization (RMA) (CU-CONSOL-RMA) kit must be ordered equal to the quantity of qualified servers being returned to Sun. RMA kit(s) must be in the same ship-set as the upgrade.*

Server Consolidation Trade-In Program *(continued)*

Description	Order Number
For Consolidation on E220R or E420R - Factory Installed Components	
Competitive consolidation upgrade of non-Sun category 2 or 3 and qualifying Sun systems to a UltraSPARC-II 450MHz processor module with 4MB cache for either the E220R or E420R rack servers Factory Installed Customer Returns: Complete non-Sun or qualifying Sun system including CPU, memory and drive	CUCONSLFA-A3XM450 ¹
For Consolidation on E220R or E420R - Field Installed Components	
Competitive consolidation upgrade of non-Sun category 2 or 3 and qualifying Sun systems to a UltraSPARC-II 450MHz processor module with 4MB cache for either the E220R or E420R rack servers Field Installed Customer Returns: Complete non-Sun or qualifying Sun system including CPU, memory and drive	CU-CONSL-A3XM450

Server Consolidation Trade-In Program *(continued)*

Description	Order Number
For Consolidation on Netra t 1120/1125/1400/1405 - Factory Installed Components	
Trade-in qualified non-Sun server or Sun server for 440MHz UltraSPARC -II/4MB eached CPU installed in the Netra t 1120, 1125, 1400, or 1405 telco servers. Factory Installed Only Customer Returns: Complete quali- fied non-Sun or Sun server with CPUs, memory, and drives.	CUCONSLFA-M1197
For Consolidation on Netra t 1120/1125/1400/1405 - Field Installed Components	
Trade-in qualified non-Sun server or Sun server for 440MHz UltraSPARC -II/4MB eached CPU installed in the Netra t 1120, 1125, 1400, or 1405 telco servers. Field Installed Customer Returns: Complete quali- fied non-Sun or Sun server with CPUs, memory, and drives.	CU-CONSL-M1197

Server Consolidation Trade-In Program *(continued)*

Description	Order Number
For Consolidation towards new E3500 and E4500 Base Packages	
Consolidation to Enterprise 3500 Server Base Package, w/ tower enclosure, one SunCD 32, two Power/Cooling Modules, two CPU/Memory Board, four 400MHz/8MB UltraSPARC Modules, two 1 GB mem- memory options, one SBus I/O Bd, Solaris Server License. Customer returns: Qualified Competitive Server System w/min. config. Each system should contain: System enclosure, CPU and System board, memory and internal peripherals.	CU-CNSL-E3502-C84 ¹
Consolidation from Qualified Server system to Enterprise 4500 Server Base Pkg including Standalone Enclosure, one SunCD 32, three Power/Cooling Modules, two CPU/Memory Bds, four 400-MHz/8-MB UltraSPARC Modules, 4 1-GB Memory Options, 2 SBus I/O Board, Solaris Server License. Customer Returns: Qualified Competitive Server System w/min. config. Each system should contain: System enclosure, CPU and System board, memory and internal peripherals.	CU-CNSL-E4502-C84 ¹
For Consolidation on E3X00 and E4X00 - Factory Installed Components	
Server Consolidation Trade-in from qualified competitive or Sun server and receive one CPU/Memory Board, 1GB memory, and 2 336MHz/4MB CPU's -Factory Installed ONLY Customer returns: Qualified Competitive or Sun Server system including Chassis.	CU-CNSLFA-2602-P62 ¹
Server Consolidation Trade-in from qualified competitive or Sun server and receive one CPU/Memory Board, 1GB memory, and 2 400MHz/8MB CPU's -Factory Installed ONLY Customer returns: Qualified Competitive or Sun Server system including Chassis.	CU-CNSLFA-2602-P82 ¹
Server Consolidation Trade-in from qualified competitive or Sun server and receive one CPU/Memory Board (2602) and 256MB memory -FACTORY Installed Customer returns: Qualified Competitive or Sun Server system including Chassis.	CUCNSLFA256MB-2602 ¹

Footnotes

1. *The Consolidation Return Materials Authorization (RMA) (CU-CONSOL-RMA) kit must be ordered equal to the quantity of qualified servers being returned to Sun. RMA kit(s) must be in the same ship-set as the upgrade.*
2. *Please see the CTO Consolidation Upgrade section flow sheet for additional details.*

Server Consolidation Trade In from Competitive or Sun server(s) and receive one 400-MHz/8MB UltraSPARC CPU Module -FIELD INSTALLED Customer returns: Qualified competitive or Sun server(s)	CU-CONSOL-M2580 ¹

Footnotes

1. *The Consolidation Return Materials Authorization (RMA) (CU-CONSOL-RMA) kit must be ordered equal to the quantity of qualified servers being returned to Sun. RMA kit(s) must be in the same ship-set as the upgrade.*
2. *Please note: The family name (UG-E10000-CTO) must be selected when entering a CTO upgrade order via Sun's order entry process.*

Ordering Flow Chart for Upgrades to E10000 Capacity-On-Demand Server Consolidation

Each step represents a **required/recommended** line item on a Sales Order

Step 1 - required

Consolidation Base Package
Minimum of one per order.

CU-CONSL-E10K-C - Sun Enterprise 10000
Capacity-On-Demand System Consolidation Base
Package

Step 2- required

Capacity-On-Demand System Board Package
Minimum of five per order

CU-CONSL-2860A - Sun Enterprise 10000
Capacity-On-Demand System Consolidation Board
Package

Step 3- required

Software

SOLMS-070WD999 - Solaris 7 media kit contains
System Service Processor 3.1.1 software
E10000-SW-COD-1.0 - E10000 Capacity-On-Demand
software v1.0 for web release and all documentation

Step 4- optional

**Consolidation RTU CPUs for E10000-C Base
Package Only**

Note: Maximum of 8 additional RTU Licences per
earned eight points of Consolidation Trade-In
program.

CU-CNSL-10KRTU-TR1 - Order for additional RTU
CPU licenses for CU-CONSL-E10K-C, up to 20 RTU
licenses (note: CU-CONSL-E10K-C includes 8 RTU
CPU Licenses)

Step 5 - required

Minimum of one per order.

2722A - Control Board, with Ethernet Hub
2754A- System Service Processor (Ultra 5)
OR:
2755A- System Service Processor (E250)
3865A - Power Cord, U.S. Version
OR:
3851A - Power Cord, International Version

Step 6- optional

Various Part Numbers - Internal Disk Storage Options
Various Part Numbers - Interface and Host Adapters
Various Part Numbers - Power Control Module/ second
AC sequencer

Step 7 - required

CU-CONSOL-RMA - Order quantity must be EQUAL
to the quantity of servers trading into Sun.

Step 8 - required

**Submit Configuration to DHPG SalesDesk, with
E10000 Configuration Diagram.**
<http://sales-desk.West/>

E10000 Capacity-On-Demand Server Consolidation

Description	Order Number
For Consolidation on E10000 - Factory Installed Components	
Consolidation Trade-in Program qualified server(s) to an Sun Enterprise 10000 capacity-, on-demand base cabinet includes: 5 power supplies (9685A), 4 AC Input Modules (3875A), 16 fan trays (9671A) and a RTU license to use 8 UltraSPARCII 400MHz 8-Mbyte Modules Consolidation Trade-in Prgm Servers w/chassis(s) and mimimum system components. Note: CU-CONSOL-RMA be ordered in qty equal to qty of servers trading-in to Sun	CU-CONSL-E10K-C ¹
Consolidation Trade-in Program qualified server(s) traded-in for Sun Enterprise 10000 capacity-, on-demand system board package: 1 system boards (2761A), 4 USII modules 400MHz-8Mbyte external cache (2580A), 2GB Memory (7023A), 1 Memory Boards (7025A), 1 dual SBus I/O Boards (2730A), Does NOT include any RTU CPU Licenses-Order Separately-FACTORY CONFIGURED ONLY in base package. Customer Returns:Server Consolid. Trade-in Program qualified servers Order CU-CONSOL-RMA = qty Svrs	CU-CONSL-2860A ¹
Consolidation Trade-in Program qualified server(s) traded-in for Sun Enterprise 10000 capacity-, on-demand system board package: 1 system boards (2761A), 4 USII modules 400MHz-8Mbyte external cache (2580A), 2GB Memory (7023A), 1 Memory Boards (7025A), 1 dual SBus I/O Boards (2730A), Does NOT include any RTU CPU Licenses-Order Separately-FIELD INSTALLED ONLY Customer Returns:Server Consolid. Trade-in Program qualified servers Order CU-CONSOL-RMA = qty Svrs	CU-CONSL-C2860A ¹
Consol trade-in Prgrm qualified server traded-in toward one Enterprise 10000 RTU license for one 400MHz 8-MByte USII module. For an additional CPU license to the E10000-C system cabinet, up to 20 CPU RTU licenses Customer Returns: Qualified servers per Server Consolidation Trade-in Program terms Required to order CU-CONSOL-RMA in qty = qty of servers traded-in	CU-CNSL-10KRTU-TR1 ¹

Footnote

1. *The Consolidation Return Materials Authorization (RMA) (CU-CONSOL-RMA) kit must be ordered equal to the quantity of qualified servers being returned to Sun. RMA kit(s) must be in the same ship-set as the upgrade.*

E10000 Capacity-On-Demand Server Consolidation *(continued)*

Description

Order Number

For Consolidation on E10000 - Factory Installed Components *(continued)*

Consol trade-in Prgrm qualified server traded-in toward one Enterprise 10000 RTU license for one 400MHz 8-MByte USII module. For an additional CPU license to the E10000-C system cabinet, beyond 20 CPU RTU licenses
Customer Returns: Qualified servers per Server Consolidation Trade-in Program terms
Required to order CU-CONSOL-RMA in qty = qty of servers traded-in

CU-CNSL-10KRTU-TR2 ¹

Footnote

1. *The Consolidation Return Materials Authorization (RMA) (CU-CONSOL-RMA) kit must be ordered equal to the quantity of qualified servers being returned to Sun. RMA kit(s) must be in the same ship-set as the upgrade.*

Enterprise 10000 Server Consolidation Capacity-On-Demand CTO Upgrade Flow Chart

Each step represents a **required/recommended** line item on a Sales Order

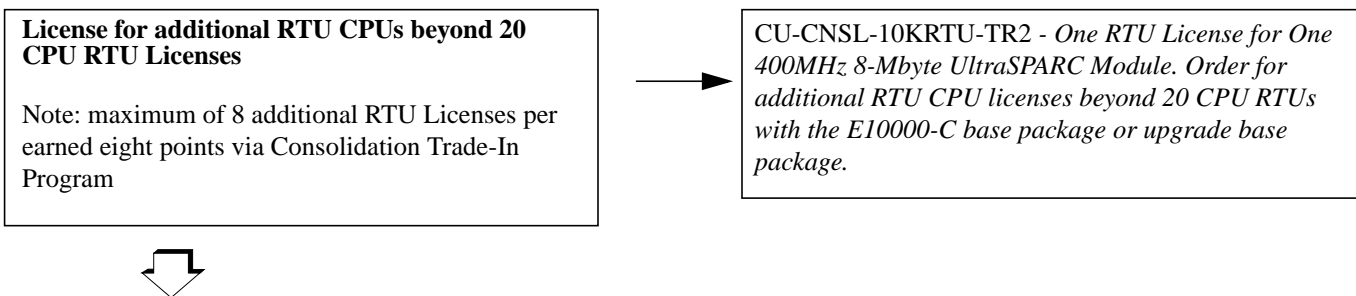

Step 1 - required

Step 2 - required

Step 3 - optional

Step 4 - required

Enterprise 10000 Server Consolidation Capacity-On-Demand CTO Upgrade Guidelines

General Comments

- Configure-to-Order allows Enterprise 10000 Capacity-On-Demand systems in the field to be expanded using pre-tested System Boards package which includes: 1 system board (2761A), 4 UltraSPARC Modules 400MHz 8-Mbyte external cache (2580A), 2 GB Memory (7023A), 1 memory board (7025A), and 1 dual SBus I/O board (2730A) when consolidating/trading-in multiple servers.
- SBus or PCI adapters are not supported with this process.
- This is an alternative to ordering these components separately, as field installed options, and assembling and testing at the customer's site.

Consolidation Capacity-On-Demand System Upgrade Board Package

- Capacity-On-Demand System Upgrade Board Package includes: 1 system board (2761A), 4 UltraSPARC Modules 400MHz 8-Mbyte external cache (2580A), 2 GB Memory (7023A), 1 memory board (7025A), and 1 dual SBus I/O board (2730A).
- Capacity-On-Demand CTO system board orders can be installed without any RTU CPU licenses and do not include any RTU-CPU licenses.

Consolidation CPU Licensing for Capacity-On-Demand Configure-to-Order Boards

- Order CU-CNSL-10KRTU-TR1 for additional CPU licenses from 9-20 RTU CPUs for E10000-C base package (note: E10000-C base package includes 8 RTU CPU licenses). Note: Maximum of 8 RTU's per 8 points achieved.
- Order CU-CNSL-10KRTU-TR2 for additional CPU licenses beyond 20 RTU CPU licenses for E10000-C base package. Note: Maximum of 8 RTU's per 8 points achieved.
- Must order CU-CONSOL-RMA in quantity EQUAL to quantity of servers trading-in.

DHPG Sales Desk

- The function of this organization is to check each Enterprise 10000 configuration for legitimacy and for satisfaction of customer's requirements (<http://sales-desk/West/>)
- Each Enterprise 10000 order must be accompanied by a configuration diagram that adds information missing from the order. For example: number of Domains, how the disk devices are connected to SBus boards, etc.

REQUIRED:

- Each Consolidation Trade-In Program order must include a proposal page obtained by using the Consolidation Trade-In Calculator at: <http://edss.corp/attackpack/consolidate/expand/>

Disk Arrays

StorEdge A1000 Upgrades

Description	Order Number
Upgrades to Sun StorEdge A1000 Tabletop/Deskside	
Upgrade, 36-Gbyte (4 x 9.1-Gbyte 10K RPM disks) Sun StorEdge A1000 Tabletop/Deskside with 1 HW RAID Controller Card, 2 Power supplies, 2 fan trays (4fans), 2 Differential UltraSCSI to host ports Customer Returns: SPARCstorage Array 1xx system or Multipack disk with minimum of 10GB of disk -OR- 15-GBs of individual disk of 1.05G or greater	UG-A1000-36G-10K
Upgrade, 109-Gbyte (12 x 9.1-Gbyte 10K RPM disks) Sun StorEdge A1000 Tabletop/Deskside with 1 HW RAID Controller, 2 Power supplies, 2 fantrays (4fans), 2 Differential UltraSCSI to host ports Customer Returns: One SPARCstorage Array 1xx system or Multipack with minimum of 20-GB of disk -OR- 25-GBs of individual disk of 1.05-GB or greater no floppies).	UG-A1000-109G-10K ¹
Upgrade to Sun StorEdge A1000, 72GB (4 x 18GB/10K rpm). Tabletop or Deskside w/ one HW RAID controller, 2 power supplies and 2 fan trays(4 fans). 2 UltraSCSI-differ- ential ports, 24MB std. cache. Customer Returns: Either SSA 1xx or Sun Multipack with 20GB of disk storage OR 25GB of individual disk storage of 1.05GB or greater (no floppies).	UG-A1K-72G-18G10K
Upgrade, 218-Gbyte (12 x 18.2-Gbyte 10K RPM disks) Sun StorEdge A1000 Tabletop or Deskside with 1 HW RAID Controller, 24MB std cache,2 Power supplies, 2 fantrays (4fans), 2 Differential UltraSCSI to host ports Customer Returns: One SPARCstorage Array 1xx system or Multipack with minimum of 20-GB of disk -OR- 25-GBs of individual disk of 1.05-GB or greater no floppies).	UG-A1K-218G-18G10K ¹
Upgrade to Sun StorEdge A1000 145GB (4 x 36.4GB/10K rpm). Tabletop or Deskside w/ one HW RAID controller, 2 power supplies and 2 fan trays(4 fans). 2 UltraSCSI-differ- ential ports, 24MB std. cache. Customer Returns: Either SSA 1xx or Sun Multipack with 20GB of disk storage OR 25GB of individual disk storage of 1.05GB or greater (no floppies).	UG-A1K-145G-36G10K
Upgrade, 291-Gbyte (8 x 36.4-Gbyte 10K RPM disks) Sun StorEdge A1000 Tabletop or Deskside with 1 HW RAID Controller, 24MB std cache,2 Power supplies, 2 fantrays (4fans), 2 Differential UltraSCSI to host ports Customer Returns: One SPARCstorage Array 1xx system or Multipack with minimum of 20-GB of disk -OR- 25-GBs of individual disk of 1.05-GB or greater no floppies).	UG-A1K-291G-36G10K ¹

General Notes

- *Maximum discount may apply; contact your local Sun sales representative for details.*
- *Terms and conditions of upgrade sale requires that residuals be returned to Sun Microsystems within 30 days of receipt of product, otherwise you will be billed for the non-returns.*

3. *Order part number UG-RMA (RMA Kit) as a separate line item on the sales order. This is required for Factory Installed Storage Systems.*
4. *Standard Configurations are Sun's recommended configurations.*

StorEdge A5200 Upgrades *(continued)*

Description	Order Number
Upgrades to Sun StorEdge A5100 and A5200 - Factory configured into cabinet	
UPGRADE, 200GB Sun StorEdge A5200 (22 x 9.1GB, 10,000rpm low profile FC-AL drives) 3 power supplies, 2 interface boards (1 GBIC each), 2 2 meter fiber optic cables with rackmounting kit installed for Factory Configured internal to Enterprise System cabinet Customer Must Return: One Sun SPARCstorage Array 1xx System with 25-GBs of disk minimum, OR one Sun StorEdge A5000 14-drive system with 45-GBs of disk.	UGFA-522A-200GR4 ^{1,2,3}
Upgrade to 400GB Sun StorEdge A5200 Rackmountable Array (22 x 18.2GB, 10,000rpm low profile FC-AL drives) includes three power supplies, two interface boards (one GBIC ea), and two 2 meter fiber optic cables. Rackmounting kit installed for Factory Configuring into Enterprise System Cabinet. FACTORY INSTALLED. Must order UG-RMA (RMA kit) as separate line item to ship in same shipset. Customer Returns: One SSA 1XX or 2XX w/150GB OR One StorEdge A5000 w/90GB of disk minimum.	UGFA-542A-400GR4 ^{1,2,3}
Upgrade to 509GB Sun StorEdge A5100 Rackmountable Array (14 x 36.4-GB, 10000rpm half-height FC-AL drives) includes 3 power supplies, 2 interface boards (1 GBIC each), two 2-meter fiber optic cables. Rackmounting kit installed for Factory Configuring into 68" Enterprise System Cabinet. FACTORY INSTALLED. Must order UG-RMA (RMA Kit) as a separate line item to ship in same shipset. Customer Returns: Sun SSA 1XX or 2XX w/ 150GB of disk OR One Sun StorEdge A5000 w/90GB of disk.	UGFA-552A-509GR4 ^{1,2,3}

General Notes

- *A power cord is required and must be ordered as a separate line item.*
- *Maximum discount may apply; contact your local Sun sales representative for details.*
- *Terms and conditions of upgrade sale requires that residuals be returned to Sun Microsystems within 30 days of receipt of product, otherwise you will be billed for the non-returns.*
- *Sun Migration Services (which helps customer migrate from SPARCstorage Array to Sun A5000) and Sun Installation Services (ArrayStart) are available.*
- *For additional options, please refer to the StorEdge A5X00 Ordering Flow Chart in the Disk Arrays section.*

Footnotes

1. *Specify the appropriate U.S. or International power cord.*
2. *Specify the desired version of Sun StorEdge Volume Manager.*
3. *Order part number UG-RMA (RMA Kit) as a separate line item on the sales order. This is required for Factory Installed Storage Systems.*

CPU Module Upgrades

Module Upgrades

Description	Order Number
Upgrade to 400MHz UltraSPARC-II Module with 2MB e-cache for Ultra 2	
From Sun Ultra 300-MHz Module	
Upgrade from 300MHz/2MB UltraSPARC CPU to UltraSPARC-II 400MHz CPU module with 2MB e-cache for Sun Enterprise 2 server and Sun Ultra 2 Desktop Customer Returns: 300MHz/2MB UltraSPARC-II CPU from either the Sun Enterprise 2 server or Sun Ultra 2 workstation	UG-M300-M400
Upgrade to Model 1400 Module for Ultra 2	
From Sun Ultra 2 Model 1170, 1200 or 1300 Module	
Module upgrade from Ultra 2 Models 1170, 1200 or 1300 to 400MHz CPU Model 1400 - CPU only Customer returns: * U2 Model 1170, 1200 or 1300 CPU	UG-M1XXX-M1400
Upgrade to Model 1300 Module for Ultra 2	
From Sun Ultra 2/Enterprise 2 Model 1170 or 1200 Module	
Module upgrade from Ultra 2 Models 1170, 1200 or similar to Ultra 2 Model 1300 - CPU only Customer returns: * U2 Model 1170, 1200 or similar CPU	UG-M1XXX-M1300

General Note

- *Maximum discount may apply; contact your local Sun sales representative for details.*

Ordering Notes

- *Sun Ultra modules are supported only in Sun Ultra 2 series systems.*
- *Requires Solaris 2.5 or later Solaris 2.x release.*
- *Terms and conditions of upgrade sale requires that residuals be returned to Sun Microsystems within 30 days of receipt of product, otherwise you will be billed for the non-returns.*

Module Upgrades *(continued)*

Description	Order Number
Upgrades to 400-MHz Module with 8-Mbyte external cache	
From Enterprise 167-MHz Module with 0.5 or 1-Mbyte external cache	
Upgrade from 167-MHz UltraSPARC Module with 0.5MB or 1MB external cache to 400-MHz UltraSPARC Module with 8-Mbyte external cache -FIELD INSTALLED Customer must returns: * 167MHz UltraSPARC Module with .5MB or 1MB External Cache	UG-M2510-M2580
Upgrade from 167-MHz UltraSPARC Module with 0.5MB or 1MB external cache to 400-MHz UltraSPARC Module with 8-Mbyte external cache -FACTORY INSTALLED Customer must returns: * 167MHz UltraSPARC Module with .5MB or 1MB External Cache	UGFA-M2510-M2580
From Enterprise 250-MHz Module with 1 or 4-Mbyte external cache	
Upgrade from 250-MHz UltraSPARC Module with 1MB or 4MB external cache to 400-MHz UltraSPARC Module with 8-Mbyte external cache -FIELD INSTALLED Customer must returns: * 250MHz UltraSPARC Module with 1MB or 4MB External Cache	UG-M2550-M2580
Upgrade from 250-MHz UltraSPARC Module with 1MB or 4MB external cache to 400-MHz UltraSPARC Module with 8-Mbyte external cache -FACTORY INSTALLED Customer must returns: * 250MHz UltraSPARC Module with 1MB or 4MB External Cache	UGFA-M2550-M2580
From Enterprise 336-MHz or 400-MHz UltraSPARC Module with 4-Mbyte external cache	
Upgrade from 336-MHz or 400MHz UltraSPARC Module with 4MB external cache to 400-MHz UltraSPARC Module with 8-Mbyte external cache -FIELD INSTALLED Customer must returns: * 336MHz or 400MHz UltraSPARC Module with 4MB External Cache	UG-M2560-M2580
Upgrade from 336-MHz or 400MHz UltraSPARC Module with 4MB external cache to 400-MHz UltraSPARC Module with 8-Mbyte external cache -FACTORY INSTALLED Customer must returns: * 336MHz or 400MHz UltraSPARC Module with 4MB External Cache	UGFA-M2560-M2580
From any non-UltraSPARC module	
Upgrade from a non UltraSPARC module to a Enterprise Server 400-MHz Module with 8-Mbyte External Cache -FACTORY INSTALLED Customer must return: Any non UltraSPARC Sun processor module	UG-M2580

General Notes

- *Maximum discount may apply; contact your local Sun sales representative for details.*

Module Upgrades *(continued)*

Description	Order Number
Upgrades to 336-MHz Module	
From Enterprise 167-MHz Module with 0.5 or 1-Mbyte external cache	
Upgrade from 167-MHz UltraSPARC Module with 0.5MB or 1MB external cache to 336-MHz UltraSPARC Module with 4-Mbyte external cache -FIELD INSTALLED Customer must returns: * 167MHz UltraSPARC Module with .5MB or 1MB External Cache	UG-M2510-M2560 ¹
Upgrade from 167-MHz UltraSPARC Module with 0.5MB or 1MB external cache to 336/333-MHz UltraSPARC Module with 4-Mbyte external cache -FACTORY INSTALLED Customer must returns: * 167MHz UltraSPARC Module with .5MB or 1MB External Cache	UGFA-M2510-M2560

General Note

- *Maximum discount may apply; contact your local Sun sales representative for details.*
-

Ordering Notes

- *Sun Ultra modules are supported only in Sun Ultra 2 series systems.*
 - *Requires Solaris 2.5 or later Solaris 2.x release.*
 - *Terms and conditions of upgrade sale requires that residuals be returned to Sun Microsystems within 30 days of receipt of product, otherwise you will be billed for the non-returns.*
-

Footnotes

1. *This upgrade cannot be configured at the factory. It is a field installed upgrade.*
2. *Contact local Sun IBB rep BEFORE quoting/ordering as there can be significant pre-requisites.*

Module Upgrades *(continued)*

Description	Order Number
Upgrades to 336-MHz Module <i>(continued)</i>	
From Enterprise 250-MHz Module with 1 or 4-Mbyte external cache	
Upgrade from 250-MHz UltraSPARC Module with 1MB or 4MB external cache to 336-MHz UltraSPARC Module with 4-Mbyte external cache -FIELD INSTALLED Customer must return: * 250-MHz UltraSPARC Module with 1MB or 4MB External Cache	UG-M2530-M2560 ¹
Upgrade from 250-MHz UltraSPARC Module with 1MB or 4MB external cache to 336-MHz UltraSPARC Module with 4-Mbyte external cache -FACTORY INSTALLED Customer must return: * 250-MHz UltraSPARC Module with 1MB or 4MB External Cache	UGFA-M2530-M2560
From any non-UltraSPARC Module	
Upgrade from a non UltraSPARC module to a Enterprise Server 336-MHz Module with 4-Mbyte External Cache -FACTORY INSTALLED Customer must return: Any non UltraSPARC processor module	UG-M2560

Upgrades to 250-MHz/4MB Modules

From Enterprise 167-MHz or 250-MHz Module with 0.5 or 1-Mbyte external cache

Upgrade from 167-MHz or 250-MHz UltraSPARC Module with 0.5MB or 1MB external cache to 250-MHz UltraSPARC Module with 4-Mbyte external cache Customer must return: * 167-MHz or 250MHz Module with .5M or 1MB External Cache CUSTOMER INSTALLABLE	UG-M2510-M2550 ^{1,2}
---	-------------------------------

General Note

- *Maximum discount may apply; contact your local Sun sales representative for details.*
-

Ordering Notes

- *Sun Ultra modules are supported only in Sun Ultra 2 series systems.*
